7+ years of experience in building high-impact applications and solutions. I've held roles in both **backend and frontend development**, and I've had the honor of leading technical teams on challenging projects

WORK EXPERIENCE

Backend Developer

El depa de Rocko

07/2022 - Presente

Lima, Per3

- Directing the creation and implementation of technological solutions for the web system of an innovative Peruvian startup specialized in the rental of petfriendly apartments. My focus was on designing and programming the fundamental functionalities of the backend, ensuring the efficiency, scalability and security of the system.
- Work closely with a multidisciplinary team, from designers to user experience

Fullstack Developer

Bitel Per3

01/2020 - 03/2022

Lima, Per3

- Leader of programming projects in the Digital Business area, I assumed responsibility for both backend and frontend development.
- My role involved supervising and actively contributing to the creation of fundamental systems for our operations, including outstanding projects such as Speedtest, Web Recargas and Ecommerce

Fullstack Developer

Municipalidad de Bellavista

01/2019 - 12/2019

Lima, Per3

- Responsible for the requirements in the internal maintenance system and the intranet of the municipality.

Backend Developer

Coderstrike soluciones

01/2018 - 12/2018

Lima, Per3

- In charge of programming technological solutions for mobile devices and web platforms. During this process, I implemented the required functionalities and performed quality tests.

Backend Developer

Softy

05/2016 - 12/2017

Lima, Per3

- Responsible for designing and programming an educational management system that included the modules of Registration, Events, Collections and Evaluations. My job was to lead the development team, define the system requirements, design the architecture and the database.

EDUCATION

Graduated in Computer Engineering

Universidad Ricardo palma

08/2013 - 12/2019

Lima, Per3
